Overview

Every minute of every day we are faced with a torrent of information – sales messages, persuasive arguments, questions to answer and opinions to form. How do we know which is the correct position to take? Which sources or arguments should we listen to? How do we determine who is more credible, how do we judge whether something is of value or not?

In order to make good decisions it's crucial that we evaluate things critically and use reliable approaches to decide and take the best course of action. This means seeing through self-serving articles, polarized opinions or emotionally-charged arguments or claims.

This practical session challenges you to question how you interpret the world around you, helping you learn how to take an objective, impartial view on complex information and make sound decisions on issues related to your everyday work.

“

Don't just take our word for it ...

A highly interactive session, full of energy, insightful ideas and new ways of working. I have no hesitation in recommending.

JANE HAGUE,
EXCEL

”

Who should attend

Anyone who has to source, digest or collate complex information, or make decisions or judgment calls about staff, strategy or project management.

What you'll do

- ▶ Develop a strategy for mitigating against cognitive biases.
- ▶ Learn how to apply relevant tools and approaches to the types of information you are exposed to and decisions you need to make.
- ▶ Develop approaches to source more critical feedback to check your assumptions and biases.

- ▶ Develop a checklist to help evaluate information and assist decision-making.

What you'll learn and discover

- ▶ The ability to make the right decisions for the right reasons.
- ▶ How to think quickly and clearly.
- ▶ How to deal with ambiguity.
- ▶ How to interpret and understand complex information.
- ▶ How abstract thinking can help creative and connection-making abilities.

Results

Make better decisions by using tools and techniques to understand complex information and take the best course of action.
